

## CORE Produce Expands Offerings

We are delighted to announce that our Core Produce is expanding to include Apples and Carrots! That will bring our total available Core offerings to four (apples, carrots, onions and potatoes).

**As a reminder, Core Produce offers year-round availability of quality inspected, repacked, highly desired fruits and vegetables.** These four products are some of the most desired by our food insecure neighbors and offer us a great opportunity to have all four items available every time your program is open for food distribution.

Here is a screen shot of the offers as you will see them effective on Monday September 30th.

Core potatoes and Core onions have been available since May. We have been successful in making sure there is inventory available for your orders, even during the off-season. With the opening of our new volunteer repack center on September 10<sup>th</sup>, we are confident in our ability to expand this program to these two additional items.
